EDUCATION

Erode Sengunthar Engineering College,Erode

Bachelor of Engineering - 8.0 August 2024 - May 2028

PROJECTS

AI/ML-Powered Smart Attendance Management System Mar 2026 - Apr 2026

- Developed an AI/ML-based system to automate student attendance tracking and minimize manual effort.
- Implemented attendance data processing, record management, and reporting to improve monitoring and operational efficiency.
- Applied data analysis techniques to identify attendance patterns and support data-driven student attendance monitoring.
- **Technologies:** Python, HTML, CSS, JavaScript, MySQL
- **Libraries:** Pandas, NumPy, Scikit-learn.
- **Tools:** Jupyter Notebook, VS Code, Git, GitHub.

Ai Gym Coach May 2026 - June 2026

- Developed an AI-powered gym coaching application to provide personalized workout guidance and enhance users' fitness training experiences.
- Implemented intelligent feedback and progress tracking to help users monitor workout performance and identify areas for improvement.
- Designed a user-friendly interface to deliver an interactive and personalized coaching experience.

Technologies: Python, HTML, CSS, JavaScript.
Libraries & Frameworks: OpenCV, MediaPipe, NumPy, Pandas, Scikit-learn

SKILLS

Technical Skills

- **Programming Languages:** Python, Java, C
- **AI/ML:** Artificial Intelligence, Machine Learning, Supervised Learning, Unsupervised Learning, Data Preprocessing, Model Evaluation
- **Libraries & Tools:** NumPy, Pandas, Matplotlib, Scikit-learn, JupyterLab
- **Databases & Tools:** MongoDB, MySQL, Git, GitHub, VS Code
- **Core Concepts:** Data Structures and Algorithms (Java), Object-Oriented Programming (OOP), Exploratory Data Analysis (EDA)

CERTIFICATE

Basics of Python — Successfully completed

Internship

Summer Intern – India Space Lab
June 17, 2026 – July 31, 2026

- Completed technical training in Advanced Drone Technology, CanSat and CubeSat Satellite Systems, Remote Sensing and GIS, Rocketry, and Disaster Management.
- Worked on **PID Controller Tuning and Autonomous Navigation Projects**.
- Completed a project on **Designing a Ground Control Station (GCS) for a CanSat Project**.
- Performed **structural and aerodynamic evaluation of a rocket fin using SimScale**.
- Developed technical knowledge and problem-solving skills through hands-on learning and project-based activities.
